

Harness & Context

trajectory packaging, memory, model-call sequencing

Platform-runtime agents

Role-structured systems

Scaffold-centric orchestration

Runtime memory / adaptation

Interface & Observation

action units, observation formatting, compression

Direct-command agents

ACI-mediated agents

Platform-runtime agents

Model / Policy

Model issues commands or actions

Observation

Runtime returns observations to the model

Command Action

Terminal Runtime & Workspace

Control, Recovery & Governance

sandboxing, rollback, approval, error bounding

Direct-command agents

Role-structured systems

Scaffold-centric orchestration

Training & rollout env.

Terminal Runtime & Workspace

persistent state, environment setup, isolation

Direct-command agents

Platform-runtime agents

Training & rollout env.

action-observation loop

verification & feedback
